

LETTER FROM THE GIRLS OF
GYEKRUM LAMBO SCHOOL
KARATU
TANZANIA
26-09-2019

KARATU DISTRICTS COUNCIL
GYEKRUM LAMBO SECONDARY SCHOOL

1: OWNERSHIP

Gyekrum Lambo Secondary School is a community based school. Students are from pure peasant families. The parents contribute meals, stationaries, uniform and other school miscellaneous for the students. However some of the parents fails to contribute the mentioned requirements due to the poor economic status; the thing which is also challenge to our academic performance and sometimes cause drop-out from the school.

2: LOCATION

Our school located at a beautiful country called - Tanzania, at far Northern region called Arusha in Karatu district.

The school is about 13 kilometer from Karatu center, The specific village school is located called Gyekrum Lambo.

The school has 260 students of which boys are 85 only, and 175 are girls.

REASONS FOR REQUESTING THE GIRLS DORMITORY PROJECT.

So far the school has 12 years since was launched, Many students passed through the school and majority are girls.

Since the beginning to now the school girls students are facing a lot of challenges like; Walking long distance, fall in risk of being raped, tiredness from walking fatigues and other the like.

I: WALKING LONG DISTANCE

Some of our fellow students are coming from far away, even more than ten (10) kilometers, that are always walking to and from the school.

This movement some times make them to miss some session for coming late to school.

Therefore is our hope that the project will rescue us from missing some school sessions.

II: FALL IN RAPPING RISKS.

Since school was begin we have being facing the challenges and good number of our sisters get pregnancies and then drop out from the school hence the end of their dreams of being somebody as they fail to proceed with studies. Some of the girls ~~domitory~~ project will even committed.

Suicide due to these incidence. However is our hope that the girls domitory project will be the right solution for these problems.

III: TIREDNESS FROM WALKING LONG DISTANCE

As from the above explanation majority of us are coming far away from the school. These are always being tired hence low/poor efficiency of the tired students get sleeping. This problems could be drive out if the girls domitory project is successfully done.

IV: POOR ACADEMIC PERFORMANCE

The study enviroment at home is not conducive, this led us to poor performance in academic, this is due to varieties of responsibilities at home. Usually girls in our society have some duties to perform such as; cooking, fetching water, looking after their young and many others.

The girls domitory project will rescue us from these fatigue hence strengthen our academic performance.

A part from all the above, the project associate with construction of kitchen and dinning hall, which enable us to take and prepare meals on sanitary environment. It will ~~prepare meals~~ also make us comfortable and promote our health. Currently we take our meals on unconducive enviroment as you see the photographs attachments

As our priority and on behalf of the Gyekrum Lambo secondary and Community, we all request on humble thanks to the team under Alberto Navarro for supporting an idea of constructing the Girls dormitory project, kitchen, Garden and drinking hall for Gyekrum Lambo secondary School.

We wish the team a warm success and the everlasting prayers for the successful implementation of this project.

Thank you.

Yours,

- 1) IRENE SADIKI ELI - School head prefect
- 2) BRENDA JOHN - food and health prefect
- 3) CATHERINE ANAKI - Sports prefect
- 4) NEEMA KASTULI - Social prefect.
